

## New Key Programming Software compatible with AUDI\* Slot Keys ADS2323 - Code D755331AD

August 2022

Advanced Diagnostics is pleased to announce the release of new software to program slot keys for popular Audi\* models. The software works together with the new Silca Slot Key HU66S04 released at the same time.

### What does the software do?

The ADS2323 software programs slot keys for various Audi\* vehicles worldwide even in an all keys lost situation. The software bypasses the security pincode during the procedure and programs the remote and the transponder at the same time. Pre-coding is required for the replacement key, this is written to the key automatically via the vehicle as part of the procedure.

All the keys and remotes have to be erased before programming new ones. The Smart Aerial is only required to reset used aftermarket keys and is not needed for the normal key programming procedure.

### What else is needed?

Smart Pro

Silca Slot Key HU66S04

### OFFER DETAILS

Cable	ADC2000
Software category	C
Smart Aerial required	Only to reset used aftermarket keys
Other accessories required	No
