Electromechanical Door Locks

Electromechanical Door Locks
Nexion® Electronic Keyless Lockset

General Information

The Nexion Electronic Keyless Lockset represents the next generation in home security. This stylish lockset combines the security of an automatic deadlatch with added safety features, plus the convenience of keyless operation using the Q-Key remote control.

The Nexion Keyless Entry Lockset is battery operated and emits an audible and visual confirmation of activation by the Q-Key remote control. The Q-Key has a range of up to three metres and uses the latest in encrypted rolling code technology for the highest security possible. Additional Q-Key remotes can easily be programmed by following a simple sequencing procedure. Should the Q-Key remote ever be misplaced, the lockset can be manually operated with a key.

Features

- Keyless entry using Q-Key (remote control)

- Fully encrypted rolling codes

- Safety features include **SafetyRelease** to minimise the risk of being locked in and Lockout Release

- Simple programming sequence to add or disable Q-keys and has a range of up to 3 metres

- The lockset provides both audible and visual confirmation of electronic activation, the lockset mode is shown by LockAlert

LOCKALERT®

The Nexion also has the unique Lockwood LockAlert status indicator that shows at a glance the lockset mode. The lockset can operate in three modes: Secure Mode, Safety Mode and Passage Mode.

Secure Mode   *Safety Mode*   *Passage Mode*

Secure Mode (Red) Handles securely locked from both inside and outside

Safety Mode (Yellow) Handles securely locked from outside and free from the inside

**Passage Mode (Green)** Handles free from both inside and outside

Electromechanical Door Locks
001Touch™ Keyless Electronic Deadlatch

General Description

For 30 years Lockwood's iconic 001 has been securing homes in Australia. The 001 as we know it today has now become digital. As with the original product, the 001Touch™ uses the 001 Deadlatch to secure the door internally however, the external cylinder has been replaced with a stylish digital touch screen keypad. The ability to use a pin code or key card offers a convenient keyless solution.

Key Features

Touch screen Keypad
The touch screen keypad has no mechanical buttons which means no trace of your secret pin code.

4-12 Digit pin code
Choose a pin code from 4 – 12 digits, this could be ideal for children or occupants that loose keys on a regular basis.

Key Cards
Program up to 20 Key cards into your lock and have the ability to remove them individually.

Tested in accordance with AS4145.2-2008
The 001Touch has been tested in accordance with the Australian lock standard. Please refer to website for more information.

Secure Mode
You have the option to lock the 001Touch with the internal key, the key card and pin number automatically unlocks upon entry. This safetyRelease function minimise the chance being locked inside your house.

Low power consumption
Unlock your door up to 10,000 times with one set of 4 x AA batteries. We recommend the batteries are changed every 12 months regardless.

Outdoor weather resistant keypad
The Keypad is designed to withstand most weather conditions.

Master code
You will have the ability as a Master to add and delete users.

User code that expires
You have the ability to program a code that may last from 3 – 336 hours. This is ideal when a tradesman requires access to your house for a few hours or when your neighbour is looking after your home for up to 2 weeks and the duration you would like it to last.
Cryptic code function
Prevent others from identifying your pin code during access, the cryptic code function confuses the onlooker but at the same time allows you to still gain entry.

User codes and setting remain if batteries are removed
The settings, codes and key cards will remain programmed in the lock in the event the batteries are depleted.

Automatic Locking
Once the correct code or key card is presented, the lock will remain unlocked for 5 seconds and will lock automatically when the 5 seconds expire.

Visual guide for programming
For added convenience, a light guide will assist in the programming of some key features. (Refer installation guide)

Electromechanical Door Locks
001Touch™ Keyless Electronic Deadlatch

Low battery

When your battery reaches critical level (30%) a warning light will come on reminding you to change the battery.

Battery check function

The battery level can be checked without removing the batteries. With a simple sequence of buttons you can tell if your battery level is between 100% - 30%.

Emergency battery connection

In the event your battery goes flat you have two battery contact points that fit a standard 9V battery, you can place the battery here and power the lock temporarily to enter your pin or key card.

Keypad Case

High purity zinc alloy
