Back to School 2020 with SALTO electronic locking solutions

Like many schools, Leighland Christian School's expanding needs for flexible access control were not being met by their master key system. With security supplier SECURATECH and LSC, the school chose SALTO to improve access and risk management at their Ulverstone campus in Tasmania. SALTO has the widest range of stand-alone electronic locks on the market, with a product for virtually any door and application.

“**SALTO creates a culture of trust. Secure, flexible and reliable access control is now a systemized outcome for our school community – it's the way we do business now.**”

DAVID GREY
Business Manager
Leighland Christian School

SALTO AND LSC

From pre-sales support through to system implementation, LSC can help you with everything SALTO. Both SALTO and LSC are more than happy to provide you with sales and presentation support when engaging with your potential customers - just ask.

SALTO XS4 online and offline electronic locks, GEO cylinder locks, XS4 Locker locks, and control units were installed in the school, controlling 190 doors in administration areas, classrooms, common areas and store rooms. Access points were also added to four automatic doors, an external gate and the building lift. Leighland employs SALTO SVN-Flex, a feature that enables SALTO locks and cylinders to directly update cards at the door; reducing the cost and operational inconvenience of installing and using dedicated update points.

Another powerful feature for the school was the ability to lockdown immediately from a central control point. The lockdown can be activated through SALTO ProAccess Space software or via a physical emergency lockdown button located in the admin area. SECURATECH carefully planned the transition from traditional to electronic keys by pre-loading all staff and access points into the software, as well as issuing out credentials in advance before any hardware was installed.

Schools need suppliers they can trust, and Leighland is no exception. SECURATECH has provided many years of reliable service to Leighland and loves working with SALTO and LSC.

“SALTO is an excellent choice for schools with the long term vision to better manage their environment. With Karl Slater from LSC and their fantastic in-house technical support and knowledge of SALTO products, we ensured the project was well-planned and met the school's requirements,” said Kaleb Lehman, Director of SECURATECH.

More schools are adopting EAC which presents a fantastic opportunity for pro-active locksmiths and security providers. For more information on how to get started with SALTO, please get in touch with LSC or visit www.saltosystems.com.au.

CARAVAN SECURITY SOLUTIONS

According to the latest figures from the Caravan Industry Association of Australia, RV ownership in Australia has reached an all-time high, with 679,378 recreational vehicles registered in 2018. This equates to one in every 13 households owning a recreational vehicle, with caravans and campervans now being the fastest growing vehicle type in Australia by registration for the past eight years.

Grab a slice of this growing market segment with our caravan and campervan specific security solutions from ADI Lockwise and Silca Keys.

We're excited to announce a full new range of keys for "Trimark" brand locks as found on many caravans, mobile homes, custom vehicles and canopies.

There's 11 in the range, all are available from LSC now.

AUTOMOTIVE NEWS

TECHED[®]

Tech Ed announces the launch of the 2020 training program with AEE102 being offered March 23 and 24 at the Distribution & Training Centre in Melbourne. This 2 day course covers soldering and programming of MCUs and flash memory devices. Some previous knowledge of EEPROM work is preferable.

For further information and registration please refer to the Tech Ed Course section of the LSC website. This course is in demand and normally sells out early.

Limited places means early registration is a must.

UPCOMING COURSE

AEE102 | MARCH 23 AND 24 | 2 DAY COURSE

Programming Advanced MCU Memory Devices and Soldering
LSC Distribution Centre, Brooklyn, Melbourne

ADVANCED DIAGNOSTICS

Advanced Diagnostics have made enhancements to and increased the coverage of the Mitsubishi software ADS2281. Proximity key programming is now available for select later models which were previously not covered.

Please refer to LSC CarLab for specific applications. Further enhancements for Mitsubishi are under development so stay tuned for updates.

Are you keeping your Smart Pro up to date? Updating the device is quick and easy. It is important to stay up to date with new software releases and bug fixes.

NEW

verroo

The Verroo Smart Range of battery powered locking devices by RMD Innovations has been designed with security, flexibility and convenience in mind. Utilising Bluetooth technology with AES128 encryption you can be sure when communicating and sharing access to your Verroo, you are doing so securely and with zero web presence. A patented challenge - response method is used whenever you send an eKey for access to your device ensuring absolute security.

Verroo's App is feature rich and gives the owner many options to customise not only your own access but your visitors too. Three levels of access are available, Normal, Admin or Owner depending on the rights you wish to give the user making it perfect for residential and semi - commercial applications alike. Verroo provides many flexible eKey options for access to your device, permanent access for family, one time use for trades and timed access for regular visitors are all available. With up to 1000 users able to be enrolled per device and each with varying access levels the Verroo strike is suitable for small, medium and large applications.

The Verroo Smart Mortice Strike

Industry standard electric strike footprint makes the Verroo Smart Mortice Strike the ideal solution for your commercial premises.

- 38000NBK03N (30 users)
- 38000NBK03N200 (200 users)
- 38000NBK03N1000 (1,000 users)

COMING SOON

MEET THE FUTURA FAMILY — ONE FOR EVERY OCCASION

Silca Futura Auto SD845059ZB

- Dedicated automotive machine for cutting inline or high security car keys
- Onboard codes, code series, cards, make and model list for easy selection

The Silca Futura family includes a range of machines to cover every application, from basic versions just for inline keys, to dedicated automotive versions, to the fully featured flagship Futura Pro.

All in one, easy to use, self-contained, constantly updated, and covered by Silca's 2-year factory warranty, Futura sets the standard by which all others are judged.

Silca Futura Pro SD847000ZB

- All in one compact yet powerful machine for virtually any residential or automotive key
- Code series, cards, pictures, makes and models all on board
- Possibility to make your own cards
- Optional engraving kit makes it a true Swiss-Army-Knife of key machines, covering just about every job you'd ever need

Silca Futura Edge SD850500ZB

- Replace your Formula-X with the Futura Edge and never print or worry about cards again
- Code series and cards on board, ready to go, all digital
- Optical reader for decoding or copying original keys

Silca Poker Pro SD851467ZB

- Ok, we know it's not technically called a Futura, but think of it as "Futura Copy"
- Dedicated, high quality, high accuracy, high speed touchless duplicator for all inline keys
- 4 way jaws & optical reader ensure a perfect grip & read of the original, and a perfect copy

TOP TIPS FROM TECH SUPPORT

Before contacting TSU staff, we advise collecting as much information as possible. This is in relation to problems with electronic key machines, either stand alone or connected to PC.

If you are in possession of one of the following machines:

Triax, Unocode 299/399, 399 Evo, Marker 2000, Viper, Futura, RW4+ and Idea

The following information is required:

1.

The internal program version and the data shown on the screen when the machine is turned on. This can also be found under the maintenance menu/ machine data in the older machines.

2.

The exact sequence of operations that have produced the error. (eg. Selected menu 2, entered SSN 582, entered code K001, pressed start)

3.

Any error messages shown on the screen need to be reported as accurately as possible.

<p>ERROR 3 Check tool installation and stop lever position!</p>	<p>ERROR 5 ERROR X AXIS No contact made!</p>
<p>ERROR 4 ERROR Z AXIS No contact made!</p>	<p>ERROR 6 ERROR Y AXIS No contact made!</p>

This information helps with a faster and more accurate diagnosis of the problem.
