JAAOTY Winners Tour ABUS & Silca

Seamless Entry with Yale Unity

Security Tech Germany

AUSTRALIA'S MOST TRUSTED COMMERCIAL PADLOCK

With the largest range of options & accessories available, custom etching or embossing & Australian Standard Certified it's no wonder the ABUS 83/45 & 83/50 are the locksmiths' padlock of choice. The standard applies to padlocks used in conjunction with padlock fittings. Requirements that relate to;

- **PHYSICAL SECURITY** is classified under 10 levels, based on performance tests that simulate attack. The security rating is based on the lowest test result achieved.
- **CORROSION RESISTANCE** is classified under 5 levels, based on standard accelerated corrosion tests.

ABUS 83/45

Physical Security Rating SP6

Corrosion Resistance Rating C4

ABUS 83/50

Physical Security Rating SP6

Corrosion Resistance Rating C4

Your customers can rest easy knowing their ABUS 83/45 and 83/50 padlocks are Australian Standard Certified, as requested by many commercial insurers & Government Depts. Just another reason why ABUS is the locksmiths' padlock of choice.

Did you know that each 83 Series padlock on the LSC website (lsc.com.au) has pdf exploded view with spare parts listing.

BORG DEADBOLT SERIES LOCKS

NEW

Just landed from Borg the new **BL2107MGPROECP** and **BL2127MGPROECP (BTB)** deadbolt series locks.

Perfect for gates, internal/external doors, storage areas or applications where a non-latching mechanical lock is required.

- Fully mechanical Marine Grade Pro digital lock
- 60mm/70mm adjustable deadbolt latch supplied
- Holdback function, can be disarmed if required
- 316 grade stainless steel internal components
- New matt black Marine Grade Pro finish
- Fully reversible

About ECP Easi-Code Procedure

No longer is it necessary to remove the lock and tumblers, the code can be changed with the lock on the door. The Marine Pro Series range of products has been developed specifically for marine applications. Manufactured to the highest standards using 316 stainless steel for internal components. The Marine Pro Grade series has undergone extensive testing to ensure that the coding chamber is resistant to salt water corrosion. Combined with the new matt black Marine Pro grade finish giving the series even more protection against harsh environments.

STU WILL BE VISITING A BRANCH OR STATE NEAR YOU SOON!

In 2009 LSC launched the first “Showbus”, taking our machinery and products to customers far and wide.

Tom Stokes, LSC’s Operations Manager reflects: “we’d thought about how to keep up the coverage and support to the regional customers, and we’d done some roadshows, especially around Queensland. But shipping everything was a chore, and we wanted something easier to deploy”. Other industries offered a clue, with automotive providers offering travelling showrooms and experience centres.

Now a new Showbus is born – STU. STU is the Security Training Unit, and after months of preparation it’s ready to hit the road. STU has a full commercially racked interior, a 3000W true sine wave inverter and heavy-duty power management system, and is loaded with the latest LSC equipment.

Designed to be more flexible than before (and tad smaller), STU will be visiting a branch or state near you soon. Importantly – we will bring our products to YOU. We know visiting a branch isn’t easy if you’re outside a metropolitan area, and this will be a great way to experience and learn about our products. Your AM will be in touch with details.

UNITY SERIES COMING SOON
in MATT BLACK

Smart Unlocked Any Time, Anywhere.

Yale Unity Entrance Series with Connect Plus Wi-Fi Bridge

The Unity Entrance Series is the answer to seamless entry with the Yale Unity Entrance Lock and the **NEW Yale Unity Security Screen Door Lock**.

Together when installed with a Yale Connect Plus Wi-Fi Bridge, the Unity Entrance Series features DualDoor™ Technology*. With a single command the user can operate both the security screen door and the main entrance door together. Door lock or unlock command operates both locks (Unity Security Screen Door Lock and Unity Entrance Lock) in a sequence.

The Yale Access ecosystem can integrate with the Unity Security Screen Door Lock and Unity Entrance Lock together to operate both locks with a single command. The technology works seamlessly, to provide ultimate user convenience. Users can enter the home without keys and save the effort of operating the screen door and main entrance door locks together.

Yale Connect Plus WiFi Bridge

Download the free Yale Access app on iOS and Android.

Disclaimer: Other products' brand names may be trademarks or registered trademarks of their respective owners and are mentioned for reference purposes only. Products are sold separately.

*DualDoor Technology requires use of a Yale Connect Plus WiFi Bridge or two Yale Connect Bridges (one per lock) to operate.

Part of ASSA ABLOY

Yale Access App

Auto-lock and unlock when coming and going

The auto-lock feature can automatically lock the door upon leaving, either immediately after closing or after a set amount of time via the Yale Access App. When returning, the door will auto-unlock using geofencing technology, so there is no need to fumble around with keys.

Grant entry from wherever with the Yale Access App

Remote access means that your customers can let in family, friends and trusted visitors like the cleaner or dog walker – from anywhere – when a Yale Smart Lock is paired with the Yale Connect Plus Wi-Fi Bridge. If someone forgets to lock when they leave, it can be taken care of with the tap of a finger.

Know the ins and outs of the home

The 24/7 activity feed will help check who is coming and when – even when nobody is there. Know when guests have arrived, what time children got home, and whether a tradesmen or cleaner was in to get the job done.

Expecting guests? Send a virtual key

Send virtual keys to friends or family via the Yale Access App. Guests can come and go as they wish – without the worry of lost keys.

Use your voice to control your lock

Yale Access works with Amazon Alexa, Apple HomeKit and Google Home. The lock is voice controllable using Alexa or Google Assistant.

Data privacy

We keep your personal data secure in accordance with recognized security standards. As part of the ASSA ABLOY Group, Yale is committed to operating in compliance with data laws globally including the General Data Protection Regulation (GDPR) and are invested in data trust and security for the long-term.

ABUS VISIT

LSC along with our partner brands Silca and ABUS sponsor the MCAA's John Andrew Apprentice of the Year Award. Every year the MCAA across Australia and New Zealand run a competition to select the best final year apprentice, the competition is tightly fought, and is quite prestigious. The test covers picking, impressing, lockfitting, master keying, automotive, and general knowledge. The prize for each winner and their mentor is an all-expenses paid trip to Silca's factory in Veneto, Italy and ABUS' factory in Wetter, Germany.

In early March winners from 2019 Jesse Shepherd (Valley Locksmiths & Security), 2020/21 David Cowley (Precision Locksmiths) and 2022 Charles McMahon (Next Gen Locksmiths) finally made the trip to Europe. The first leg of the trip was a visit to ABUS Pfaffenheim – home of the manufacturing of ABUS keying systems, followed by a visit to ABUS Security World.

ABUS Security World is the ultimate security experience where you can immerse yourself in the entire world of security in one place! Each winner enjoyed a guided tour through the mobile and home security environments, the ABUS museum which showcases the history of ABUS since its foundation in 1924, and the new ABUS Archive which was a journey in time.

A trip to Germany isn't complete without tasting some German cuisine and beer. All the tour group were wowed by Germany's scenery, experiencing snow (some for the first time) and quaint half-timbered towns.

SILCA VISIT

The next part of the journey for the group was to head to Italy to visit the team from Silca. The factory tour started with a look at factory one where 1 million key blanks are produced each day! The group were amazed at all the steps used to create a key blank from the raw materials to the nickel plating and quality assurance testing.

From Factory 1 we made our way across to Factory 2 to see the engineering and design hub for Silca machinery. Here they produce 1000's of machines per year, all hand finished by Italian artisans. We got to see everything from Bravo duplicators, Futura Pro code machines to Unocode F-Series and the mighty Protec being assembled, quality tested, calibrated, packed and made ready to ship out.

The group were spoilt on the final day of the tour with a trip to Venice and experienced a number of Italian delights including coffee, pizza, pasta and prosecco.

We thank both Silca and ABUS for their hospitality, generosity and time.

LOCKWOOD ELECTRIC STRIKES

ASSA ABLOY

ES110 Series Electric Strike 05225000

- ⚡ Multi voltage 12 volts - 24 volts

HAPPY CUSTOMERS

LOCK IT UP TOWNSVILLE'S [QLD]

Trent Binder is all smiles as his LSC Account Manager Cameron Lister delivered this new Silca Triax Key Machine.

LOCKRITE SECURITY [WA]

Stuart White from Lockrite Security with his new Silca Flash Mobile charged and ready to go!

LET YOUR CUSTOMER UNDERSTAND THEIR KEYS WITH SILCA

End-users find keys confusing, often a keyring has many brass or silver coloured keys of the same type, and keeping tabs on which key opens what is challenging. Luckily, Silca offers a vast range of coloured keys to help your customer find the right key first time.

SILCA SILKY

A unique type of key which has a coloured rubber ring permanently moulded to the top of the key. A range of colours and profiles are available.

SILCA TAGGY

The newest and most premium offer. Large, easy to grip key heads combined with a coloured 'tag' area where the customer can write their own description.

SILCA ULTRALITE

Special Titanium-enriched alloy keys are stronger than brass, last just as long, are extra light weight, and come in multiple colours and profiles.

SILCA VELVET

Sleek and low key (no pun intended), Silca Velvet keys have a soft finish with pastel colours for a modern look.
