

**Key Programming Software Update for Ford®
ADS2269 - Code D753712AD
FIRST AFTERMARKET SOLUTION IN THE WORLD
NOW INCLUDES THE NEW KUGA**

February 2020

Advanced Diagnostics is pleased to announce an **update of the ADS2269 key programming software for Ford® to include the new Kuga Europe and additional Escape models for Australia and USA.**

What does the software do?

The software is the first solution worldwide to program both bladed and proximity keys for Ford® even when the alarm is active and in a situation of lost keys. The software also includes an add key function.

Transponder and remote are programmed at the same time for a streamlined procedure. No additional cables or software are required, but the Smart Pro must be connected to the internet. The procedure requires 2 tokens: one for server access/authentication and one for key programming.

Note: This software does not alter the vehicle firmware, making it a safer solution compared to others available on the market.

What else will I need?

Smart Pro

OFFER DETAILS

Cable	ADC2000
Smart Aerial required	No
Software category	A+
Other accessories required	No
