

WEATHER STOPPER II

STI WEATHER STOPPER II

Large weather proof cover to protect devices such as external call points.

Physically larger than the Weather Stopper, the Weather Stopper II is a tough, clear polycarbonate cover designed to protect manual call points and other devices where protection from the environment is necessary, such as car parks, food processing factories and swimming pools. It is also ideal for saline atmospheres. It is available for flush or surface mounted devices with a variety of cable entry gaskets.

HOW IT WORKS

The Weather Stopper II consists of a clear polycarbonate cover, frame and gaskets that retrofit over the device to be protected. The gaskets seal the unit preventing dust, grime and water from getting to the device. In the event of an emergency, simply lift the cover to gain access to the protected device.

MODELS AVAILABLE
